

Miller & Rhoads

Out-of-Town Orders Promptly Filled.

Women's Suits, \$17.75

Regular \$27.50 Values.

Spic & Span New Suits—just from the tailors' They came in yesterday too late to announce in last evening's papers.

SHADOW STRIPE WORSTEDS, in black, navy & green. 45-inch Coat, semi-fitting, satin lapels & lined with satin. Plain gore skirt, trimmed with narrow bias bands & satin-covered buttons.

There are only forty-three Suits in this lot—good things like these are scarce, you know.

Similar qualities & finish are selling here regularly for \$27.50.

It's hardly necessary to emphasize the advisability of early shopping this morning.

PROMISED GRANDMA FUEL; SENT HOME DEAD

Lee Cheatham Killed Before He Could Comfort Old Woman Whom He Supported.

BOTTLING PLANT TRAGEDY

Boy, Employed Wednesday, Meets Instant Death as Gas Generator Burst—Two Others Hurt.

"It is getting colder, grandma; there is no fuel in the house, but I hope when I return from work this evening I can make things comfortable for you."

With these words Lee Cheatham, seventeen years old, of 1721 Bainbridge Street, Manchester, the only support of a widowed grandmother, Mrs. R. B. Nunnally, left home at 7:15 o'clock yesterday morning to work at the bottling department of the Beaufort Lumber Company, corner Ninth and Byrd Streets. An hour afterwards the boy was dead, a victim of an explosion, said to have been caused by the carelessness of a fellow-employee.

Cheatham was killed by a blow on the back of the head, which rendered death almost instantaneous, and which occurred when a gas generator, built of solid iron, burst in all directions, and a result Cheatham was killed, Thomas Knight, another employee, was badly burned about the face and body, and several negroes at work in the bottling department suffered more or less injuries. The explosion was sudden.

Her Only Support.

The death of the young Manchester boy is distressingly sad. He obtained the position with the Beaufort company, which was the only one he ever held, Wednesday afternoon, and his promise to his grandmother, by whom he had been raised, was that he would work with might and main to make her declining years comfortable. Cheatham was an orphan, and his grandmother, leaves no relatives except a married sister and a brother who lives in a distant county.

It is a strange coincidence that, four years ago, almost to the very day, Cheatham's father, William Cheatham, dropped dead, and his only son, the boy now dead, was left an orphan and the only comfort of his grandmother, whose age is now far past the allotted threescore and ten.

About the manner in which the young boy met his death there are conflicting statements, but from best accounts it appears that he was talking to a workman several yards from the generator when the explosion took place. The piece of iron which struck Cheatham continued its course, penetrating a brick wall and shattering a wooden partition beyond. Other bits of flying iron demolished the rear end of the establishment. The room was left in a state of confusion.

His Body Taken Home.

Mr. George L. Blidgood, manager of the Beaufort company, could not explain the accident, except to say that it was due to the collection of gas in the receptacle of the tank. He seemed greatly depressed over the accident, and to a Times-Dispatch reporter he said: "I would not care half so much about it if it nobody had been hurt. Cheatham was working in the pathway of the 200 pounds of flying iron, and that his head was not knocked off is a mystery."

No sooner had the explosion occurred than some one telephoned for the ambulance, and a doctor or any one else reached his side Cheatham was dead. Knight was removed to his home, No. 1217 Dance Street, in the ambulance, and was there treated by Dr. MacLean. It could not be said positively last night whether or not his sight will be lost. Dr. Carr attended the injuries of others, which consisted of nothing more serious than surface burns.

The remains of the boy were removed to Billy's undertaking establishment, and were sent home yesterday afternoon. The funeral will take place from his grandmother's home at 8:30 o'clock this afternoon.

CONFESSED THE CRIME

Detectives Tell of Confession of Aaron and Dabney to Daring Hold-Up.

Henry Aaron, charged directly with the theft of a gold watch and James Dabney, an alleged accomplice, were yesterday sent to the grand jury by Justice Crutchfield. The young men are alleged to have committed the sensational hold-up in which Commonwealth's Attorney E. W. Hubbard, of Buckingham county, was robbed on December 31. Since the occurrence the young men have publicly denied guilt, but their statements withered yesterday when Detectives White and Kellam swore that Aaron had privately confessed the crime.

It is said that Dabney had acknowledged his part in it. The boys were represented by Attorney Harry Smith and Gilbert Pollock.

Grand Court of Appeals.

The January session of the United States Circuit Court of Appeals, which is virtually adjourned until the November term, will convene next Tuesday. Judges Pritchard, Goddard and Morris will sit.

HUTZLER OBJECTS TO BECK'S REPORT

Subcommittee Will Inspect New High School Structure to Find Out About "Pointing."

CHAIRMAN'S STRONG DENIAL

Declares That He Had Nothing to Do Whatever with Any Change in Plans.

Before the Subcommittee on Grounds and Buildings last night, Chairman Charles Hutzler, of the City School Board, admitted the charge made by Building Inspector Beck that the wall of the new High School building was being pointed flat with a trowel instead of with a tool finished, as specified in the contract. He quoted, however, from Mr. Beck's report that this might not lessen the strength of the structure, and said that he had been reliably informed that the flat finish was no cheaper. In his report, Mr. Beck claimed that it was, and that the city, not the contractor, should profit by the change.

Subcommittee Chairman asked Mr. Beck if he thought the building was being erected according to specifications, and if the bricks used were "common select," as required in the contract, to which he replied "No."

Mr. Hutzler made denial. Mr. Hutzler protested, saying that only one charge was up for the contractor, and that the contractor had objected to the wording of Mr. Beck's report, which was to the effect that the change in pointing was made by the contractor after "several days" of pointing by the architect and members of the School Board.

"Neither by instructions nor by suggestions of the School Board," said Mr. Hutzler, "did he vary in the smallest way from the specifications. I object to any reference to myself as having had anything to do with the slightest deviation from the specifications."

Mr. Hutzler declared that the change was made after a conference between Architect Bryant and the Building Inspector, after which the former stated that it would be satisfactory to Mr. Beck. Mr. Beck said that it was, in so far as it affected the strength of the building, but that he did not authorize it. He said that he had not taken up by the City Council.

In addition to the other charge, it was read from a previous report of the inspector that up to September 24 no cement tests had been made, in spite of repeated requests from the committee.

Mr. Hutzler replied that the tests were made on the very day that the letter was received.

"Why were they not made before?" asked Mr. Beck.

"Because we did not have the money on hand for that purpose," said Mr. Hutzler.

Will Show Other Things.

Mr. Beck also called the attention of the committee to the fact that the seams between the bricks were irregular, being in some places almost one-half an inch broad, instead of five-sixteenths of an inch.

Feeling that the committee had heard enough, Mr. Satterfield asked that the report be formulated to the regular committee. The other two members preferred to look further into the matter, and Mr. Beck withdrew.

FORMER MEMBERS CALLED TO TESTIFY

Men Who Awarded Contracts for Flume Work Will Be Asked to Explain Details of Plan.

MUST ACCOUNT FOR DELAY

Investigating Committee Determined to Gather All Facts Before Making Report.

Notices are being served by Sergeant-at-Arms Russell on members of the two former Council Committees on Flume Work, who will be called to testify at the meeting of the Special Committee on Investigation of the Settling Basin Flume to-morrow afternoon at 3 o'clock.

Members of the Water Committee from the Council of 1904-1905 were Aldermen Henry P. Beck, A. W. Bennett, R. F. Ewing, J. H. Zimmerman, and John Mann, Jr., Councilmen Walter W. Morton, J. F. Don Leavy, John P. Lea, Robert LeMay, Scrier and Morgan, and Charles Alderman Mann was chairman and Councilman Mann subchairman.

Alderman Beck and Zimmerman retired during the term of this committee, and were succeeded by George J. Seay and Major Otway S. Allen. Councilmen Don LeMay and Charles Alderman transferred to other committees and were succeeded by W. F. Richardson and T. Francis Green.

Members of this committee will be called on to testify as to the various bids and the final award of contract for the flume, made in May, 1906, and the actual beginning of the work, the construction in August, 1906. The testimony expired by limitation on August 1, 1907.

Go Back Two Years.

Members of the committee from 1905 to 1906 were Aldermen A. W. Bennett, P. H. Donahoe, J. H. Zimmerman, James A. Moncreux and R. G. Reynolds, Councilmen E. A. Barber, Jr., W. P. Richardson, J. F. Don Leavy, J. H. Green, W. L. Morgan, R. Mills and Green, Cliff Richards. Mr. John Mann, Jr., was chairman, and Mr. W. F. Richardson subchairman.

Throughout the two years of this committee the flume was more or less under construction, although the flume was not completed until there was one period of six months when no concrete was laid.

It is expected that the members of the two committees the entire history of the flume can be traced. Especially there was a delay of more than a year in the award of a contract, why after sets of bids were rejected, and after the flume was under construction, without calling for a new contract, which was estimated to be complete in four months occupied more than two years, the contract being signed in May, 1906, and being completed in May, 1908; how much supervision the committee in charge paid to the work; whether its plans were real inspections or mere "junks" made up of a few sticks, a house and an afternoon stroll up and down the flume.

KING WINTER HERE WITH THE GOODS

Cold Wave Comes Bounding Out of the West, with a Light Flurry of Snow.

TEMPERATURE DOWN TO 21

Reached That Point Before Midnight, with Snowfall on Card for To-Day.

Bringing with him a flurry of fine, driving snow, the King Winter descended upon Richmond and practically all of Virginia yesterday, and now both the city and the State are experiencing the coldest weather of the present season. The weather man is not saying just now how long the cold wave is to continue, but he predicts a heavy fall of snow to-day, and it may be possible that the chilling blast will prevail for several days or a week.
